

STEFFEN SCHEUERMANN LIVE 2021 TECHRIDER

P.A SYSTEM :

A PROFESSIONAL QUALITY stereo system, 3 or 4 ways, subs and mid-hi speakers each side, suited to the venue (Funktion-one, L-acoustics, Meyer, d&b, or equivalent). The system should render a clear sound, with no noise, in the frequency range 20-20.000 Hz.

SOUND CHECK :

A minimum of 1hour for soundcheck prior to doors is required. This 1 hour period begins after all backline gear is in position and operational on stage, and after the P.A is functional and working properly.

Please provide the best and most direct connection to the house P.A mixer

MONITORS :

1 pair of HIGH QUALITY monitors (LEFT / RIGHT) Full-range side fill monitors are preferred to floor wedges. Volume controlled from the stage mixer (booth output) The monitors should render the SAME SOUND QUALITY as the FOH system (GOOD MONITORS = GOOD SHOW)
